Wednesday, Jan. 20, 2021, 8:45 a.m.

Please share this information with your teams and front line staff, especially those who may not access emails or computers.

**NEW TODAY:** Here’s the latest information about Michigan Medicine’s management of operations:

- COVID-19 PATIENT STATS
- TEAM MEMBER COVID-19 TESTING
- VACCINE STATS
- TOWN HALL ON FRIDAY, 3 PM
- FEBRUARY AND MARCH TOWN HALL DATES
- HRO TOOL OF THE MONTH: SBAR
- VISITOR POLICY UPDATE
- PPE UPDATE AND PANDEMIC PRECAUTIONS
- COVID-19 SALIVA TESTING
- HIT PAUSE: HOPE, INSPIRATION, GRATITUDE

COVID-19 Patient Percent Positivity (7 day moving average)

- Symptomatic testing: 11.67%
- Asymptomatic testing: 1.30%

**Discharges:** 1,625 total COVID-19 discharges to date, 7 in the last 24 hours. These numbers include patients discharged to skilled nursing facilities but excludes deaths and discharges to hospice.

**Deaths and hospice:** Since March 10, Michigan Medicine hospitals have had 220 total deaths or discharges to hospice, 3 in the last 24 hours.

**FEBRUARY AND MARCH TOWN HALL DATES**

Virtual town halls will be scheduled on the following Fridays in the coming months:

- February 5 and 19
- March 5 and 19

All meetings will begin at 2 p.m. Zoom information will be shared prior to each meeting date.

**HRO TOOL OF THE MONTH: SBAR**
As Michigan Medicine continues its high reliability journey, clear communication is critical to maintain situational awareness and help reduce errors. The SBAR (Situation, Background, Assessment, Recommendation) tool is a simple way to organize your thoughts for more effective communication.

Below are resources that may be useful in developing SBARs:
- For more information, visit Headlines: https://mmheadlines.org/2021/01/hro-tool-of-the-month-sbar-video/ Video: What is an SBAR? https://youtu.be/IPBrFnajwjA

VISITOR POLICY UPDATE
For patients at the end of life, the visitor policy will be expanded on Monday, Jan. 25, to allow for a maximum of six (6) designated visitors total at any given time. Minors may be designated end of life visitors if supervised by an adult. COVID-19 positive patients and patients under investigation are still limited to two (2) designated visitors. Visitors must wear appropriate PPE, and must be informed of risk. Staff are expected to provide PPE assistance for all visitors. Please make your units and teams aware of this policy change that will take effect next Monday, Jan. 25, 2021.

PPE UPDATE AND PANDEMIC PRECAUTIONS
Many questions have been raised regarding how long certain strategies for preventing COVID-19 need to continue in light of the vaccine administration. There is still widespread transmission in our community and in many areas across the country. It is critical to continue the interventions to prevent the spread of COVID-19. The beginning of vaccination brings a tremendous amount of promise, but it is important to remember:
- The efficacy of the vaccine is not 100%
- Vaccine evidence supports reduction in symptomatic events; asymptomatic events were not studied in the vaccine trials, which means that we don’t yet know whether those that have been vaccinated are able to carry and spread virus without experiencing symptoms

Please continue to practice Pandemic Precautions at work
1) Always wear a mask
   a. When you remove your mask to eat/drink, make sure you are at least 6 feet from others
2) Wear eye protection for all patient facing activities. The compliance with eye protection has some opportunity for improvement, and wearing eye protection for all patient facing activities is an important intervention to prevent exposure to COVID-19
3) N-95s with eye protection or PAPRs and gowns and gloves should be worn to provide care to any patient that has or is suspected of having COVID-19
4) N-95s with eye protection/PAPR should be worn for all high risk Aerosol Generating Procedures (even in patients negative for COVID)

Please note that many have been observed wearing N-95s covered by a surgical mask for all patient care. While this might make people feel like they are more protected, wearing a surgical mask over and N-95 can impact the seal, making the N-95 less protective. In addition, observations of this practice have identified that many that are doing this are adjusting their mask/N-95 throughout the day, which increases the risk of cross contamination.
COVID-19 SALIVA TESTING
COVID-19 saliva testing is available in the Towsley lobby for Michigan Medicine employees. To register for the first time and to schedule an appointment for testing, please use the below links:
  o cstp.umich.edu/register
  o cstp.umich.edu/test

HIT PAUSE: HOPE, INSPIRATION, GRATITUDE
In this spot, we will share stories of hope, inspiration and gratitude. Take a few minutes to pause and reflect:
Read about a patient who was diagnosed with ALS and had a life-changing experience at Michigan Medicine after meeting his pulmonologist and his respiratory care team.

Weekly bulletins and policies are posted on Michigan Medicine Headlines at https://mmheadlines.org/covid-19-updates/. Please bookmark this site and refer to it for the most up-to-date information.
